

# Easy to Use, FUN & Affordable Geocaching GPS!

Preloaded with **30,000** geocache locations covering Australasia, including more than 10,000 in New Zealand, the Geomate.jr is the fastest and easiest way to get in on the geocaching fun – just switch it on and be directed to your closest cache. Yep, it's that easy.

But you want to create your own private geocaching network and adventure? Not a problem. Using the Update Kit, you not only get the latest public caches, but you can build your very own geocache list and load it onto any Geomate.jr you like. Now that's pretty cool.

## Here are just some of the features of the nifty Geomate.jr GPS receiver:

- Clear arrow and distance navigation to the closest geocache
- Cache info like ID, terrain, difficulty, & size
- Set a HOME waypoint to navigate back to
- Latitude, longitude, & height information for map use
- And even a GPS compass for traditional navigation

flip for details

## More Than Geocaching

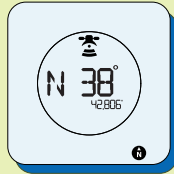

With the GPS compass, latitude, longitude and height displays, the Geomate.jr is a powerful navigation tool and the perfect companion to any topographic map.

Set a waypoint & navigate back to that point

GPS-based compass for traditional navigation

Latitude & longitude displays for map use

## Create Your Own

Want to create your own private geocaching course? No Problem! With the Update Kit you can create your own geocache list and load it into as many Geomate.jr's as you want. Just the thing for Scout troops, schools, and youth clubs.
